

Aayush Yadav

Data Analyst | AI Engineer | SQL | Python | Power BI

Mumbai, India | PH: +91-7021080797 | aayush09204@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

EDUCATION

Thakur College of Engineering and Technology, University of Mumbai

Bachelor of Technology in Artificial Intelligence and Data Science (CGPA: 8.8/10)

Mumbai, India

Nov 2022 – July 2026

ADDITIONAL SKILLS

Programming Languages: Python, SQL, JavaScript, HTML, CSS, Spark (Familiar)

Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, DAX, Power Query, ETL Pipelines, Large Data Processing

Visualization & BI: Power BI, Tableau, Excel Dashboards, Plotly

Microsoft & Fabric: Microsoft Fabric, OneLake, Data Lake, Data Factory, Power BI Service, Power Automate, Excel (Advanced), SQL Server, SharePoint, Office 365, Copilot

Databases & Cloud: PostgreSQL, MySQL, MongoDB, Supabase, AWS S3, Docker, Hadoop (Familiar)

Developer Tools: Git, GitHub, Jupyter, Google Colab, VS Code, PyCharm, Figma

Certifications: Python 3.4.3 Training – [IIT Bombay](#), Advanced SQL – [HackerRank](#), Software Engineering – [JPMC \(Forage\)](#)

WORK EXPERIENCE

Data & AI Engineering Intern

DataAstraa LLP

Mumbai, India

Jul. 2026 - Present

- Built and maintained **10+ Power BI dashboards** and SQL-based reporting solutions for **2+ enterprise clients** (Dorf Ketal, ICICI Lombard), delivering end-to-end analytics for business and operational KPIs.
- Performed **data engineering** across **Microsoft Fabric** (OneLake, Data Lake, Data Factory, Power BI Service), ingesting, transforming, and storing data through **ELT** reporting workflows.
- Published and maintained **10+ Power BI reports** in Power BI Service, managing data refreshes, KPI tracking, and access updates to keep dashboards aligned with evolving requirements.
- Automated **10+ recurring reporting and operational workflows** using **Power Automate**, cutting manual intervention by approximately **80%** and improving delivery turnaround for clients.
- Coordinated with Dorf Ketal on **20+ dashboard update and reporting requests**, resolving issues and implementing requirement changes to keep deliverables on schedule.

PROTOCO TECHNOLOGIES PVT. LTD

AI/ML Intern

Mumbai, India

Feb 2026 – May 2026

- Designed and deployed an AI-powered BI analytics platform using **FastAPI**, enabling automated dashboard generation, intelligent chart-type selection, and KPI card creation from user-uploaded datasets, reducing manual reporting effort by 50%.
- Built an end-to-end data pre-processing pipeline for parsing, cleaning, and validating **CSV/XLSX** inputs, and integrated a locally-hosted **Ollama LLM** to enable natural-language Q&A on structured data delivering a fully on-premise AI solution with no external API dependency

TECHNOHACKS SOLUTIONS PVT. LTD (Remote)

Data Science Intern

Mumbai, India

Feb 2025 – Apr 2025

- Undergoing onboarding for analytics projects involving **real-world datasets**, performance reporting, and dashboard-driven insights
- Assisting in **collecting** and **cleaning** data from multiple sources to ensure accuracy and consistency before analysis.

PROJECTS

E-Commerce Data Pipeline & Warehouse Analysis

Jul 2026 – Aug 2026

Tech Stack: Python, REST API, PostgreSQL, Parquet, dbt, Power BI

- Built a batch ETL pipeline in Python to ingest **100K+ e-commerce records** from REST APIs with pagination, retry handling, validation, and structured logging.
- Implemented Snappy-compressed Parquet with partitioning for efficient storage and querying, and developed dbt models in PostgreSQL with automated data-quality tests.
- Designed a star-schema warehouse and Power BI dashboards for revenue, order, customer, and product analytics, enabling efficient reporting and data-driven insights.

Customer Churn Analysis & Prediction Dashboard

Mar 2025 – Apr 2025

Tech Stack: SQL Server, Power BI, Python (Scikit-learn, Pandas)

- Engineered features and pre-processing pipelines to train a Random Forest model achieving **91% churn prediction accuracy**.
- Embedded model outputs into a **Power BI dashboard** to deliver strategic analytics and actionable campaign insights for stakeholder decision support and channel optimization.

Employee Attrition Analysis & Prediction

Jun 2025 – Aug 2025

Tech Stack: Python, Pandas, Scikit-learn, Streamlit

- Analyzed **HR records** using Pandas and NumPy to identify key attrition drivers through data cleaning and feature engineering.
- Built and analysed **Logistic Regression** and **Random Forest** models, achieving **87.8% accuracy** in predicting employees at risk of attrition.
- Developed an interactive **Streamlit application** for real-time attrition prediction, presenting model outputs and key HR insights.

ACTIVITIES & PUBLICATIONS

Team Aeronix, TCET (Vice-Captain)

Mumbai, India

- Led team to top-10 finishes at **IIT Bombay** and **Delhi Technoxian** in Aeromodelling and mentored **15+ junior** members.
- Final Year** – 1st Place, 17th **Multicon-W** 2026 (Published), Branch Level Winner (Best Paper) – [Certificate](#)
